

Forestry Technician

**NORTHWEST
NATURAL
RESOURCE
GROUP**

Northwest Natural Resource Group seeks a forestry technician to assist with forest measurement, tree marking for commercial thinning, plot layout, and other forestry field work, 3 to 5 days per week.

The ideal candidate has experience with basic forest inventory techniques, is adept at field work in a variety of challenging terrain and weather conditions, and maintains a professional and collegial attitude with co-workers and landowners. This position is approximately 90% fieldwork in all weather conditions. Experience with GIS software is beneficial, but not required. You must be comfortable working alone in the forest at times, and you will need your own vehicle to travel to work sites, largely located within a 2-hour drive of Tacoma. Travel time and mileage will be reimbursed.

NNRG is following all applicable COVID-19 safety protocols, including social distancing while working together outdoors and driving separately to job sites.

Compensation for this position is \$20 to \$23 per hour, depending on experience.

To apply, send a letter of interest, resumé, and the names of two references to: jobs / at / nnrg.org. Begin the subject line with the words "Forest Tech". The position is open until filled; review of applications begins March 29.

NNRG believes that organizations — much like forests — thrive on greater diversity. Applicants from backgrounds traditionally underrepresented in the forestry field are encouraged to apply.
