Describe pre- and post-harvest stocking levels:

Describe the written harvest prescription. Was it followed on the ground?

Did all clear cuts comply with FSC requirements (10-30% pre-harvest basal area retained in harvest openings larger than 6 acres)?

Were all riparian or wetland buffers in the harvest area a correct size and clearly marked in the field?

How was the site replanted? Are native species being replanted? What is the seed source?

Did logs that were sold as FSC certified had the correct Chain of Custody number (SA-FM/COC-001394XXX) and FSC Claim (100% Pure) on invoices, load tickets, bills of lading, etc?
