Rollout scale by Pacific Rim Log Scaling & Grading Bureau. Prices based on net Scribner MBF scale.  
 All lengths must have 10" trim added (unless noted otherwise).  
 All knots must be trimmed even to the bark. Excessively knotty logs will be rejected.  
 Please call for timber appraisals. We also buy standing timber. Prices are subject to change without notice.

Mount Vernon, WA 98273

## Log specifications

1. Preferred lengths: 40', 36', 32', 24', 20', 16'. In that order of preference. We will take 2' multiples down to 12', so all 2 foot multiples from 12 to 40' are acceptable.

a. Long logs are always better than short logs. We always want 40's if we can get them. In our purchase agreement, we do not use an average length that you must hit. However, I do monitor it. As I referred to, if I have worked with a logger/landowner, or feel like I can, I am happy to give out a camprun price because I know that they are trying to get long logs. For those who, through experience, have troubles making long logs, the matrix price sheet will serve its purpose by making it in their best interest to get long logs.

2. Trim: 12"

3. Knots: We are a dimension mill. Like all other mills, the higher the quality log we get the better. But as far as knot size, we do not spec it. Since we are basically a smaller log mill we do not get the old growth where knot size will be an issue. If you have something that you think may be too rough, let's look at it and discuss.
